It consists of at least all of the following: (1) at or van that carries an organized collection of library materials; (2) paid staff; and (3) Regularly duled hours (bookmobile stops) for being open to the public. Count vehicles in use, not the number of sthe vehicle makes.
8. I	s your library an independant taxing authority? YesNo
	Public service hours a. Per week. Report the total scheduled public service hours in a typical week in October for all service outlets (central/main library, branches, and bookmobiles). Do not include the kiosks in question 8 above. Maximum number of service hours per service outlet is 168 (7 days x 24 hours per day). For bookmobiles, report only hours open to the public, not time in transit. Total weekly public service hours:
	b. Per year. This is the sum of <i>actual</i> annual public service hours for outlets. Include the hours open for public service for central/main library, branches, bookmobiles, and books-by-mail only. Do not include the kiosks in question 8 above. For bookmobiles, count only the hours the bookmobile is open to the public. For administrative entities that offer <i>only</i> books-by-mail service, count the hours that the outlet is staffed for service. Minor variations in scheduled public service hours need not be considered. However, extensive hours closed to the public due to natural disasters or other events should be excluded from the count. Total yearly public service hours:

B. STAFF HOURS

Report figures as of the last day of the fiscal year. Include actual hours worked (including paid leave and vacation), paid by the library budget. Report total number of staff hours worked per year, not number of persons. For example, if 2 librarians each work $1,000$ hours per year, then report $2,000$ hours (i.e. $2 \times 1,000$).
Define your standard work week in terms of hours? (35 hrs, 37.5 hrs, 40hrs, etc.):
12. Librarians. Report the total annual hours of all who are staff members doing any work that requires professional training and skill in the theoretical or scientific aspect of library work, or both, as distinct from its mechanical or clerical aspect. The usual educational requirement is a master's degree (or its historical antecedent) from a library education program. Include staff in managerial positions as well as in other positions. If MLS and non-MLS librarians are not separable, enter only the annual total in 12c.

C. OPERATING FINANCES Sources of Income
Operating finances are defined as follows: the current and recurrent income for and costs necessary to the provision of library service, such as personnel, library materials, binding supplies, repair or replacement of existing furnishings and equipment, and costs incurred in the operation and maintenance of the physical facility. [Note: Local accounting practice shall determine whether a particular source of income or expense is an operating appropriation or expense, regardless of the examples just given. This questionnaire does not ask for capital income or expense, however you define it.]
Unless otherwise noted, all figures reported on this questionnaire should be accurate as of the end of the most recently completed fiscal year. <i>Canadian libraries should report in Canadian dollars</i> .
15. Local. Report all tax and non-tax receipts allocated by the community, district, or region of the public library and available for expenditure by the public library. Do <i>not</i> include the value of any contributed or inkind services or the value of any gifts, donations, fines, or fees.

D. OUTPUT MEASURES
Please provide data for the latest completed fiscal year. For circulation, count all materials in all formats that are charged out for use outside the library. Interlibrary loan transactions included are only items borrowed for users. Do not include items checked out to another library. Make sure that if you enter values for branches and bookmobiles, you also indicate the number of each in Items 6 and/or 7 above. If circulation of materials cannot be separated put only the total in 28.
Annual Counts
The following data elements are either exact counts or annual figures projected from counts taken on sample days. They will be used with population of legal service area to produce per capita measures.
Total Circulation - total circulation including renewals
Initial Circulation - total circulation excluding renewals
Average days of of circulation - Number of days, on average, items are circulating, ie., initial circulation days, as per policy, plus the number of renewal days divided by the total number of transactions. While some ILS systems are able to provide this number others may not, please add a note to the question with a brief explanation why you are unable to retrieve this information.
Can you breakout your physical circulation by Print, CD/DVD and Other? Yes No
If you selected "Yes" to the above skip to question 25, otherwise answer the below.
Total Circulation of physical materials
a. Initial circulation of total physical materials
b. Average days of circulation for total physical materials

29. Digital/Electronic collection retrievals (eg. streaming or database services). Do not include items reported in question 30.	
30. Total Circulation for eBooks and downloadable audio books, music, and video	
34. Annual in-library materials use	

D. Output Measures (cont'd)

35. Annual reference transactions. A reference transaction is an information contact which involves the
knowledge, use, recommendations, interpretation, or instruction in the use of one or more information
sources by a member of the library staff. It includes information and referral services. Information sources
nclude print and non-print materials or records, and, through communication or referral, other libraries
and institutions and people inside and outside the library. The request may come in person or by any other
neans from a person of any age. Do not count directional transactions or questions of rules or policies.
Note: If an annual count of reference transactions is unavailable, determine an annual estimate by
counting reference transactions during a typical week in October in which the library is open its regular
hours. Then multiply the count by 52 for the annual number.]
36. Annual number of library visits (total number of people entering library). This is the total number of persons entering the library for whatever purpose during the year. [Note: If an actual count of visits is unavailable, determine an annual estimate by counting visits during a typical week in October and multiplying the count by 52.]
37. Total annual number of programs
38. Annual program attendance (total attendees in a year)

Visits represent the number if individual sessions initiated by all visitors to your site. A visit/session ends when someone closes their browser or stops loading webpages on the website for a period of time (typically when more than 30 minutes elapses between page views, but this is arbitrary).

A visit is usually determined by each user's unique IP address, and/or their login account name when they are accessing secure parts of the website. The details for website visits/sessions are contained within the access log file for the web server(s) and may be accessible using log file analysis or web analytics reporting tools.

Virtual visits include a user's request of the library website or catalog from outside the library. A single visit to a website may involve loading of numerous webpages or gratuitous elements (images, style sheets, etc.).
